

Calling all women aged 25-64...

Don't risk dying of embarrassment

I'm too embarrassed to go for my smear test...

I've just had mine, the nurse was great. Really friendly. They have seen it all before!

Calling all women aged 25-64...

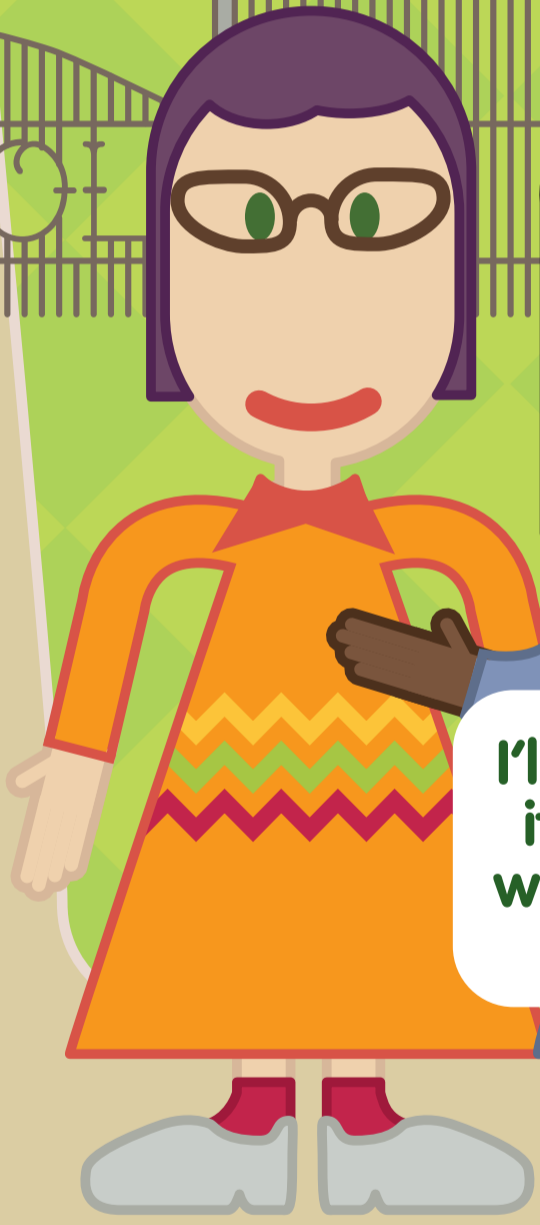

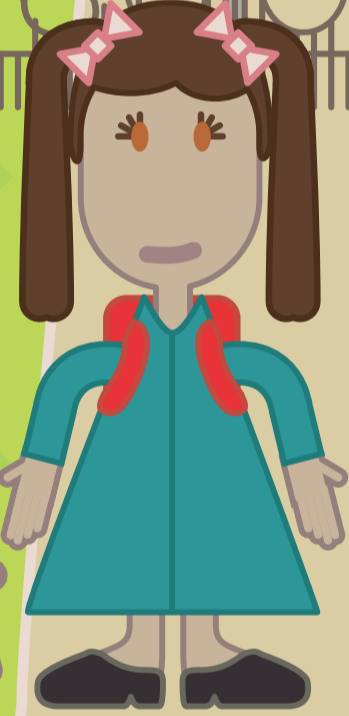

A quick test could save your life

I don't want to have a smear test, i've heard it hurts.

Mine didn't hurt and was over so quickly.

It was a bit uncomfortable but was over in minutes. I would go again.

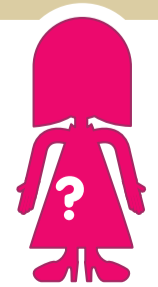

I'll come with you if you like, after we have dropped the kids off

Have your test - so your family always have YOU

I don't think I need a smear test.

We want you to go, your health is important to us. We don't know how we'd manage without you.

Calling all women aged 25-64...

Put your worry to rest by taking the test

I don't want to go for a smear test in case they tell me I've got cancer.

I know it seems scary and you would rather not think about it, but going for regular screening is the best way to make sure everything is ok.

Calling all women aged 25-64...

Take the time to save your life

I've missed my smear test again - I'm just too busy to think about it.

My friend kept putting off going and then found out she had cervical cancer. If she had gone earlier it could have been different.
